

## Disinfectant Process & Guidance

**Continue using one of the following chemicals for everyday disinfectant:**

- Clorox Healthcare Bleach Germicidal Cleaner Spray
- Clorox Healthcare Bleach Germicidal Wipes
- Clorox Healthcare Fuzion Disinfectant Cleaner
- Oxivir TB
- 3M C-diff tablets
- 3M 40A RCT

**Once you have used all of (1) of the above cleaners begin to use 3M 40A for everyday disinfectant**

- If you have a suspected or confirmed case of COVID-19, use c-diff tablet cleaner

**Why would we change cleaners?**

- 3M 40a is approved against COVID-19, but doesn't have the same effect on other possible harmful viruses or bacteria.
- C-diff tablets provide a broader range of safety.

**What do I do if I don't have 3M 40a or c-diff tablets?**

- We are working with procurement to have a large shipment delivered to the home office that will then be trucked out to each location by the FMS team.

**How can I receive training on 3M products?**

- Continue to use the products you have been trained to use. We are working with 3M to get training to every division by the end of March. Reach out to your FMS for dates.

**How long will a bottle (.5) gal of 3M 40a last?**

- A .5 gal bottle will make 116 gallons of cleaner, which will last about 5-6 weeks.

**Should we clean cardboard? How?**

- **If possible, unpack all deliveries outside.**
- If cardboard must come into the campus, it must be disinfected.
- Wipe the box down with an approved disinfectant and allow to sit for 5 minutes prior to handling.

**How should we clean the time clock?**

- Ensure there is hand sanitizer staged next to the hand sanitizer machine.
- Ensure the machine is disinfected after every shift check in.

***Continue to take daily inventory of your disinfectants, if you run low (1 weeks' worth of supply) contact your FMS directly.***

## **Rounding Guidance**

- Continue visits as needed as part of your normal roles and responsibilities

## **Vendor Deliveries:**

- All vendors and deliveries need to be screened at the front entrance.

### **What about annual inspections?**

- Continue to allow those vendor visits.
- Ensure screening of personnel at front entrance.

### **What about carpet replacements?**

- If it can wait, wait.
- Reach out to FMS if unsure.
